DETAILED ACTION

1. The Information Disclosure Statement filed 02/26/04 has been fully acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Tay et al. (US 6,740,983 B2).

Tay shows a structure of a semiconductor device comprising a rectangular body 92 (see, for example Fig. 6) having an active surface 104 and a longitudinal centerline; and a plurality of bond pads 106 disposed adjacent the longitudinal centerline, wherein the plurality of bond pads 106 are arranged in at least one longitudinal row comprising

at least two longitudinal adjacent groups of bond pads 106 separated by a greater space than a space 74 between bond pads within a group.

Concerning claim 2, wherein the at least two longitudinally adjacent groups of bond pads 106 consists of two longitudinally adjacent groups, please see Fig. 6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claims 1 and 2 above, and further in view of Kudou et al. (US 6,303,948 B1).

As per the above discussion the applied reference shows at least two longitudinally adjacent groups of bond pads 106 consisting of two longitudinally adjacent groups, but fails to teach wherein the at least one longitudinally row comprises two longitudinally rows flanking the longitudinal centerline as claimed. Kudou shows in Fig. 9 having at least one longitudinally row comprising two longitudinally rows flanking longitudinal centerline. Hence, it would have been obvious to one having ordinary skill in the art at the time the invention was made to practice having the at least one longitudinal row comprising two rows flanking the longitudinal centerline for the reasons taught by Kudou et al.
